

Table of Contents

Preface	v
Invited Lectures	
Special factors in some combinatorial structures <i>A. Carpi, A. de Luca, S. Varricchio</i>	3
Subword complexity and periodicity in two or more dimensions <i>J. Cassaigne</i>	14
On the decomposition of finite languages <i>A. Salomaa, Sh. Yu</i>	22
Computation = self-assembly + conformational change: Toward new computing paradigms <i>T. Yokomori</i>	32
Contributed Papers	
I. Automata and Languages	
Asynchronous sliding block maps <i>M.-P. Béal, O. Carton</i>	47
Bisimulations and behaviour of nondeterministic automata <i>C.S. Calude, E. Calude</i>	60
Deterministic forgetting planar automata are more powerful than nondeterministic finite-state planar automata <i>P. Jiříčka, J. Král</i>	71
Functions preserving classes of languages <i>P. Květoň, V. Koubek</i>	81
Restarting automata, Church-Rosser languages, and representations of r.e. languages <i>G. Niemann, F. Otto</i>	103
Weak cyclic forms of rw automata <i>M. Plátek</i>	115

Exponential ambiguity of context-free grammars <i>K. Wich</i>	125
 II. Codes, Combinatorics of Words, and Algebraic Methods	
A non-ambiguous language factorization problem <i>M. Anselmo</i>	141
Decidability of code properties <i>H. Fernau, K. Reinhardt, L. Staiger</i>	153
Defect theorems for trees <i>J. Karhumäki, S. Mantaci</i>	164
On the complexity of computing the order of repetition of a string <i>J. Karhumäki, W. Plandowski, W. Rytter</i>	178
New problems of pattern avoidance <i>J. Loftus, J. Shallit, M.-W. Wang</i>	185
Substitutions from Rauzy induction <i>L.-M. Lopez, P. Narbel</i>	200
Characterization of a word by its subwords <i>J. Mañuch</i>	210
On semilinearity in formal power series <i>I. Petre</i>	220
Right and left strongly testable semigroups and languages <i>J. Ruiz, P. García</i>	232
 III. Applications in Data Base Theory and Parsing	
On decidability of boundedness property for regular path queries <i>Y. André, F. Bossut, A.-C. Caron</i>	245
Bidirectional parsing for linear languages <i>Ş. Andrei, M. Kudlek</i>	257
Caterpillars, context, tree automata, and tree pattern matching <i>A. Brüggemann-Klein, D. Wood</i>	270

YakYak: Parsing with logical side constraints	286
<i>N. Klarlund, N. Damgaard, M.I. Schwartzbach</i>	
IV. Generalized Models of Grammars and Computation	
Cooperating distributed grammar systems with non-terminating components	305
<i>H. Bordihn, M. Holzer</i>	
On tally languages and generalized interacting automata	316
<i>T. Buchholz, A. Klein, M. Kutrib</i>	
Table-driven and context-sensitive collage languages	326
<i>F. Drewes, R. Klempien-Hinrichs, H.-J. Kreowski</i>	
Test tube systems: When two tubes are enough	338
<i>R. Freund, F. Freund</i>	
On fixed and general membership for external and internal contextual languages	351
<i>M. Holzer</i>	
Contextual grammars with trajectories	362
<i>C. Martin-Vide, A. Mateescu</i>	
Slender matrix languages	375
<i>R. Stiebe</i>
